- » Communication Skills
- » Study Skills
- » Time Management

Career Guidance

Aptitude Testing and counselling Center for students passing SSC, HSC and graduation examinations

Aptitude Testing **Personality Testing** **Graphology Analysis** **Counselling**

Behavioral Counselling

one to one counselling sessions for students who are in the adolescence age and facing some difficulties in their day to day life.

Child Remediation Center

Remediation and therapy Centre for special children having Specific Learning difficulties, Dyslexia, slow learners.

India's tradition in education was 'Gurukul System' where no discrimination was made between the students. Krishna, Sudama, Pandya learned together though they had different abilities, capacities and strengths for learning. If five fingers of a hand are considered as 'Pandav', every finger having different capacity but when they work united, the total strength increases a lot. This was the INDIAN approach towards education. During British regime, they changed this approach to suit their interest and it affected the basic Indian thought behind education which was on all Inclusive and integrated development of the students.

With this object in mind we introduced a concept of running a centre under the roof of the school itself, and at 'Dhruv Academy' for children who need one to one remediation or counselling. Two sessions in a week are sufficient for each child.

We trust that, collective effort of parents, Teachers, principal, counselor and remedial teacher leads to the "Holistic Development" of the child.

Dhruv's Methodology of Remediation

Assessment & Counselling
Development of Individual Education Plan (IEP)

Designing the sessions
Feedback and review
