Child Remediation Center

Remediation and therapy Centre for special children having Specific Learning difficulties, Dyslexia, slow learners.

India's tradition in education was 'Gurukul System' where no discrimination was made between the students. Krisna, Sudama, Pandya learned together though they had different abilities, capacities and strengths for learning. If five fingers of a hand are considered as 'Pandav', every finger having different capacity but when they work united, the total strength increases a lot. This was the INDIAN approach towards education. During British regime, they changed this approach to suit their interest and it affected the basic Indian thought behind education which was on all Inclusive and integrated development of the students.

With this object in mind we introduced a concept of running a centre under the roof of the school itself, and at 'Dhruv Academy' for children who need one to one remediation or counselling. Two sessions in a week are sufficient for each child.

Dhruv's Methodology | Assessment | Counselling
Development of Individual Education Plan (IEP) | Designing the sessions | Feedback and review
